APPENDIX B

Certain Risks Relating to Purchase, Sale and Use of Tokens

Important Note: As noted elsewhere in these Terms, the Tokens are not being structured or sold as securities or any other form of investment product. Accordingly, none of the information presented in this Exhibit B is intended to form the basis for any investment decision, and no specific recommendations are intended. Company expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (i) reliance on any information contained in this Exhibit B, (ii) any error, omission or inaccuracy in any such information or (iii) any action resulting from such information.

By purchasing, holding and using Tokens, you expressly acknowledge and assume the following risks:

1. **Risk of Losing Access to Tokens Due to Loss of Private Key(s), Custodial Error, or Purchaser Error:** A private key, or a combination of private keys, is necessary to control and dispose of Tokens stored in your digital wallet or vault. Accordingly, loss of requisite private key(s) associated with your digital wallet or vault storing Tokens will result in loss of such Tokens. Moreover, any third party that gains access to such private key(s), including by gaining access to login credentials of a digital wallet or vault service you use, may be able to misappropriate your Tokens. Any errors or malfunctions caused by or otherwise related to the digital wallet or vault you choose to receive and store Tokens, including your own failure to properly maintain or use such digital wallet or vault, may also result in the loss of your Tokens. Additionally, your failure to follow precisely the procedures set forth in point 3, section (c) of APPENDIX A for buying and receiving Tokens, including, for instance, if you provide the wrong address for receiving Tokens, may result in the loss of your Tokens.
2. Do not participate in this Purchase of VTX Tokens if you are not familiar with or do not understand cryptocurrencies, cryptographic tokens, and blockchain-based software systems.
3. Only participants having significant experience with, or an understanding of, the use and intricacies of cryptocurrencies, cryptographic tokens, and blockchain-based software systems should participate in the Purchase of VTX Tokens.
4. While MySAFE/Vortex (u.i.) will provide general guidelines in relation to use and storage of Tokens, you should have a functional understanding of storage and transmission mechanisms associated with cryptocurrencies, cryptographic tokens, and blockchain-based software systems. While MySAFE/Vortex (u.i.) will be available to assist you during and after the Purchase of VTX Tokens, no MySAFE/Vortex (u.i.) Party will be liable for any Loss arising out of, or in any way connected to any actions taken by, or any omissions by any Participant
5. **Token price may experience extreme volatility:** Cryptographic Tokens or cryptocurrencies that possess value in public markets, such as BTC, have demonstrated extreme fluctuations in price over short periods of time on a regular basis. You must be prepared to accept similar fluctuations in Token value. Such fluctuations are due to market forces and represent changes in the balance of supply and demand. MySAFE/Vortex (u.i.) cannot and does not guarantee any market liquidity for Tokens. Additionally, due to different regulatory requirements in different jurisdictions, and the inability of citizens of certain countries to open accounts at exchanges located anywhere in the world, the liquidity of Tokens may be markedly different in different jurisdictions.
6. **Risks Associated with Markets for Tokens:** Tokens are delivered as per conditions expressed on the Whitepaper and with the benefits and uses described on it. We will not support or otherwise facilitate any secondary trading or external valuation of Tokens. This restricts the contemplated avenues for using Tokens to obtain Services or access the Ecosystem, and could therefore create illiquidity risk with respect to Tokens you hold. Even if secondary trading of Tokens is facilitated by

- third-party exchanges, such exchanges may be relatively new and subject to little or no regulatory oversight, making them more susceptible to market-related risks. Furthermore, to the extent that third-parties do ascribe an external exchange value to Tokens (e.g., as denominated in a digital or fiat currency), such value may be extremely volatile and diminish to zero.
7. By participating in the Purchase of VTX Tokens to MySAFE/Vortix (u.i.), or receiving and holding Tokens, you acknowledge and agree that you fully understand that Tokens may experience volatility in pricing and liquidity, and that, to the extent permitted by applicable law, you agree that no other party (including, without limitation any MySAFE/Vortix (u.i.) Party) may be held liable for any Loss arising out of, or in any way connected your participation in the Purchase of VTX Tokens to MySAFE/Vortix (u.i.), or receiving and holding Tokens.
 8. Receiving Tokens has a number of risks
 - a) Tokens carry risks. Prior to receiving Tokens, you should carefully consider such risk and, to the extent necessary, consult with an appropriately qualified advisor. If any of the following risks are unacceptable to you, you should not accept Tokens. By participating in the Purchase of VTX Tokens to MySAFE/Vortix (u.i.), or receiving and holding Tokens, you acknowledge and agree that you understand the risks described below and that, to the extent permitted by applicable law, you agree that no other party (including, without limitation any MySAFE/Vortix (u.i.) Party) may be held liable for any Loss arising out of, or in any way connected with your participation in the Purchase of VTX Tokens to MySAFE/Vortix (u.i.), or receiving and holding Tokens or such risk.
 - b) Dissolution of MySAFE/Vortix (u.i.) due to a diminishment in the value of other cryptocurrencies, cryptographic tokens, and blockchain -based software systems. While some of these may have been relatively stable, it is possible that their values may drop significantly in the future, which may deprive MySAFE/Vortix (u.i.) of sufficient resources to continue to operate.
 - c) Regulatory action in one or more jurisdictions. Cryptocurrencies, cryptographic tokens, and blockchain-based software systems have been the subject of regulatory scrutiny by various regulatory bodies in numerous jurisdictions. MySAFE/Vortix (u.i.) and Tokens could be impacted by one or more regulatory inquiries or regulatory actions, which could impede or limit the ability of MySAFE/Vortix (u.i.) to develop MySAFE/Vortix (u.i.).
 - d) Insufficient interest in MySAFE/Vortix (u.i.) and VTX Tokens. It is possible that MySAFE/Vortix (u.i.) or VTX Tokens will not be used by a large number of individuals, businesses and other organizations and that there will be limited public interesting the creation and development of its functionalities. Such a lack of interest could impact the development of MySAFE/Vortix (u.i.). MySAFE/Vortix (u.i.) will contract with developers to help build MySAFE/Vortix (u.i.), and is working with third-party developers around the world to create an interest in MySAFE/Vortix (u.i.). However, MySAFE/Vortix (u.i.) cannot predict the success of these development efforts or the efforts of other third parties.
 - e) Theft. Hackers or other groups or organizations may attempt to steal Tokens.
 - f) Ethereum mining attacks. The Participant understands and accepts that, as with other cryptocurrencies, cryptographic tokens, and blockchain- based software systems, the Ethereum blockchain used for MySAFE/Vortix (u.i.) Purchase of VTX Tokens campaign is susceptible to mining attacks, including but not limited to double spend attacks, majority mining power attacks, “selfish-mining” attacks, and race condition attacks. Any successful attacks present a risk to MySAFE/Vortix (u.i.) Purchase of VTX Tokens campaign, expected proper execution and sequencing of Token transactions, and expected proper execution and sequencing of contract computations.
 9. Risks Associated with the Ethereum Protocol: Because Tokens and the Ecosystem are based on the Ethereum protocol, any malfunction, breakdown or abandonment of the Ethereum protocol may have a material adverse effect on the Ecosystem or Tokens. Moreover, advances in cryptography, or technical advances such as the development of quantum computing, could present risks to Tokens and the Ecosystem, including the utility of Tokens for obtaining Services, by rendering ineffective the cryptographic consensus mechanism that underpins the Ethereum protocol.
