

## Our One Page, which in fact are two!

This is a small introduction about ourselves, a sort of One Page Brief about ICO, Token, Product and ourselves.

### Introduction about Vortex MySafe product:

MySafe<sup>®</sup> or MySafe Vault <sup>®</sup> is the first out a minimum of 4 services a/o products that will coexist within the same ecosystem where block chain will constitute an integral part of it, the best and simple way to get familiar with the product and the service behind is to just spend a few minutes reading

this very simple presentation: <https://vortex.io/what-is-mysafe-vault/>. As a short description we can say it is an Incorruptible Vault for Valuable Encrypted Digital Documents or Files of any kind, stored, protected, completely anonymous and confidentially secured under the Block Chain technology, with different security layers and several specific functions, which allows to share, total or partial transfer, untraceable, and unless for the one who is the holder of the key or keys, depending on the grade, impossible to open, impossible to read, impossible to know its content, and fully scale-able up to the possibility to read and burn or just burn. All events are produced and generated client based, through an DAPP/APP interacting straight forward with the block chain and the back end supported farms. No other interaction than those made by the client himself. Applied technology: Evolving solution, made up of Solidity for Block Chain Interactions, SHA-512 two variants, series 2 on the front end. Encryption proprietary protocol for protect, dilution, and recovery, tunnel technology for sending/receiving from customer single app. Now use able in Mobile, Tab or Computer of any kind. Can also command IoT devices, execute remote events with phase timing, etc.

### Introduction about Vortex Ecosystem:

A multi-services and products platform where the Vortex Token Family shall be used to transact and execute orders, events, contracts and much more, linking the block chain technology to the real world and bypassing up to certain extent, over the current Internet browsing experience. Developed with DAPP's, Client API's and Proprietary Back End software, plus all interacting on the block chain (expected to be deployed on an independent proprietary but open and decentralized block chain, but with all tokens converted at equal value given on Ethereum ecosystem). In there you will find services and products like **MySafe Vault**, **ThulePay**, **MegaBCMail**, **RetailINN** (services and products names may change), and other developments either made by us or from third parties or in a joint venture, there will be place for Multi-billion Industries Exchanges and for retail exclusive but affordable shops as well. Although may not be need it, it is our intention to offer tokens and produce ICO's of all and any of the services a/o products developments as way to share our technology and advances with our community, allow buyers to profit of the expected revaluation on them, plus sharing through bonuses, the profit into all and any of the services and products developed by us, and moreover with all those connected to us in any way, those tokens will all be exchangeable in between and it is expected that in the future, will also be exchangeable with other Tokens, or Coins. If we succeed in our goals, all our tokens will become a single coin (not a token but a crypto currency) and all of the tokens from all developments will be fully convertible into the crypto currency, which will run the ecosystem, by end of 2019/middle of 2020 when transferring into our own block chain. Then all shall be integrated into the:

**More information** about project and ICO, read our White Paper >

<https://vortix.io/wp-content/uploads/2018/02/WhitepaperVortix1.9.pdf>

### **The Token:**

We follow the most common standard to make it easier, that is, ERC20, on the beginning and at launch, the first token of the family is named as VORTIX TOKEN USD (code VTX), has its value related to USD currency, and is about to be issued in the maximum quantity of 200,000,000 **ONLY**. Thereafter mint shall be stopped and no more tokens will be never issued. As far as goes the token selling, it will be produced in equivalent amount to value sold.

120,000,000 VTX tokens are allocated to public through sale and also some others are reserved for bounty campaigns, marketing and team developers, these last ones frozen for 2 years. \*

The **VTX** (code of token) has both extrinsic value as all token as later will be in a way or another exchangeable as all tokens can be (exception made those from failed projects) and we shall certainly negotiate such possibility to our buyers, but also has intrinsic value as it is linked by a bonus to a 20% equivalent of all benefits **MySAFE Vault** products will generate, payable per year basis and for next 10 years, plus will be used as purchase tool for different services and products, partially on the beginning until reach the coin status where all can be settled with the coin. All Vortix Tokens shall be converted to that coin at exchange value when the transition be in place.

**Sale of Tokens:** Has already started, PreSale is over now, with all offered tokens sold. Some are not transferred yet at request of the buyers. On May 25<sup>th</sup>, 2018, our first ICO starts and we are excited about it, hoping to sell all of the available VTX Tokens that remains : 107,500,000 VTX. We also reduced the minimum purchase to 100 VTX as a way to attract small buyers interest to our projects. However, the big discounts are also over, with a maximum available discount now set at 20% for the first ICO round, where 26,875,000 will be offered to public (same amount per round). Payment can be made in ETHER (both to contract or from Exchanges like Coinbase or similar, please observe different addresses for payments shall be given - DO NOT SEND FROM EXCHANGES DIRECTLY TO CONTRACT AS YOU RISK TO LOOSE YOUR SENT COINS), BITCOIN, BITCOIN CASH and LITECOIN. ICO will consist in 4 rounds at different prices, one every 15 days, and will end July 24, or earlier if all tokens are sold out. If you like to buy tokens, you have to register here <https://vortix.io/register/> and you will be guided through the purchase process. At the moment you can register but will only be able to buy VTX once ICO opens.

Our advice: **Time to buy VTX tokens is...** when you decide is the proper time, we always respect your opinion and decision, and is only yours.

### A Word of Caution

\*Important: There are other tokens on the Ethereum Ecosystem also with the code VTX, please be aware and observe that our tokens are only available through our website <https://vortix.io>

Beware of Scams using our name!

Beware of Fake Admins and Fraudster!

We will never DM or PM in any way to you asking for your account or any personal details, like passwords, or payments.

No one from Vortix team will send you a private message containing any contribution address or offering any bonus. Please be aware for scammers who impersonate admins and send private messages with fake **ETH address**.

Private placements from specific interested parties are handled by authorized persons and they have unique accesses and keys, for all others who wish to buy VTX token with or without bonus please be aware that this is only possible through our website only <https://vortix.io> and when purchase page is open

Nothing else, thank you so much for taking the time of reading this document and whatever doubt you have or question, do not hesitate to contact us through [pr@vortix.io](mailto:pr@vortix.io) where we shall be happy to assist or via our Telegram group ( <https://t.me/VortixICO> ) . And all news shall be published through any of our social networks, plus our website blog.
